Welcome to the

black bar

ILLUXTRON — ORANGE CLIMATE — OLUTRO

CONTAINER

What is the black bar?

The black bar is a mobile showroom built inside a 20-ft container that can easily be placed at your location. Visitors can experience Illuxtron's latest lighting innovations and explore our different lighting solutions, including architectural downlights, Lighting for Ceiling Solutions (L4CS), Light & Health applications and custom-made lighting through MIYO.

Together with our partners, the black bar demonstrates how lighting can enhance the atmosphere, comfort and functionality of any project.

In addition to the showroom, the black bar features a hospitality area with an integrated refrigerator, creating the perfect setting to discuss projects, exchange ideas and explore the possibilities of Illuxtron over a drink.

Where has the Black Bar been in Europe?

LOCATIONS

Since its introduction, the black bar has completed more than 20 tours across the Netherlands, Belgium, Germany and Austria. It is regularly used for:

- In-house exhibitions
- Customer events
- Open days
- Dealer and wholesale events
- Industry events and trade shows

This allows us to bring the Illuxtron showroom directly to customers, partners and project locations.

ILLUXTRON®
LIGHTING

Bring the black bar to your location

Would you like to inspire your customers, colleagues or business partners with the latest lighting innovations? The black bar can be booked for open days, in-house exhibitions, customer events and project presentations throughout Europe.

Contact our team to discuss the possibilities and experience our lighting solutions at your own location.

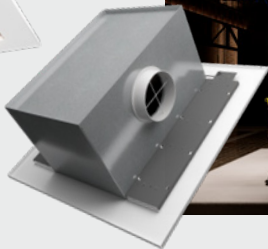

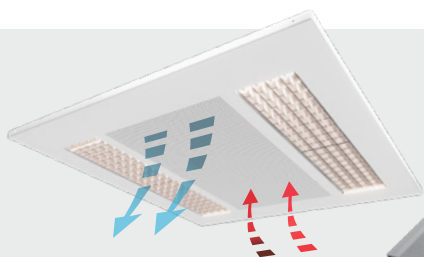

PARTNERS

In the black bar, an automated window treatment by Lutron has been installed, providing both comfort and ease of use. Lutron is a global leader in lighting control and automated window treatments.

With innovative and reliable solutions, Lutron provides optimal control over light and ambience.

Another highlight of the black bar is the Linessa Air: an innovative combination of lighting and ventilation, integrated into a single product. By combining both functions, Linessa Air creates a clean and uncluttered ceiling while also reducing installation time. The ventilation unit on the rear can be connected to virtually any ventilation system.

The Linessa Air was developed in collaboration with Orange Climate, a specialist in innovative climate solutions.

About Illuxtron

FAST DELIVERY

Thanks to efficient production planning and a well-managed inventory, many products are available with short delivery times. Standard products are typically delivered within 10 working days for orders of up to 100 pieces.

PROJECT SUPPORT

Bulk packaging, room-by-room labelling, and free GST18 plugs are all options for product delivery.

7-YEAR WARRANTY

Illuxtron lighting products are designed for long-term reliability and come with a 7-year manufacturer's warranty. When used as intended, we guarantee our products are free from material, design and manufacturing defects.

100% DUTCH DEVELOPMENT

Every Illuxtron luminaire is developed by our own R&D team in the Netherlands. From concept and engineering to continuous product improvements, we design and refine our products with a strong focus on quality, innovation and ease of installation.

CUSTOMER SUPPORT

Our customer support team is here to assist you throughout every stage of your project. Whether you have technical questions, need product information or require order support, we're happy to help.
