Lighting for
ceiling solutions

ILLUXTRON®
LIGHTING

Our custom-made product team

At Illuxtron, we've been developing solutions for various ceiling systems for years. This brochure provides an overview of the most common products.

However, if you're looking for a custom solution, our team of engineers is ready to translate your request into a custom design.

All products are assembled in sheltered workshops in Zeeland, and components are sourced from local suppliers whenever possible.

Because many of the components are mass-produced, you'll be surprised by the price-quality ratio.

About Illuxtron

With over 50 years of knowledge and experience in the lighting industry, we know our products inside out and strive for continuous improvements. We incorporate the latest technology in our LED lighting. We always look to innovate and improve, from dimmable downlights to LED panels and luxurious ceiling lights.

TRACK DIMENSIONS

A modern conference room with a long wooden table, black chairs, and a curved wall with vertical wood slats. The ceiling features a grid of dark, horizontal slats with recessed lights. A large, industrial-style chandelier with multiple spherical pendant lights hangs over the table. The text "Increase your efficiency with Illuxtron's L4CS collection" is overlaid in white.
