UNIQUE IN EVERY WAY

Could our product range match your requirements better? We will always gladly suggest a suitable product for your needs. We can make simple adjustments to existing features such as colour or size. However, we are open to more complex challenges too. We design fixtures specifically tailored to your requirements.

The luminaires from our collection are tailor-made assembled in our social and in-house workshops. We do this in the Netherlands. This enables us to choose from an extensive stock of lighting components.

LET'S BE CREATIVE

Any of our existing parts can be used when creating a brand new design. Should special parts be required, we can quickly and easily have them made by our large network of suppliers.

As a result of this approach we are able to offer a complete package. There is a wide choice of assorted and custom made products at competitive prices.

MIYO

Make it your own.

WHY MIYO?

At Illuxtron we are creating standard products that are competitive and innovative for a wide audience. We create our own parts and technologies for our luminaires. But sometimes you need something more, something different... Something special. That's where MIYO comes in.

MAKE IT YOU OWN! (MIYO)

We solve customer problems by making customised luminaires. MIYO can do that competitively because we try to use as many existing Illuxtron components as possible. We pick and combine and only have to make what we don't have in stock.

WHY WE ARE GOOD AT IT

At Illuxtron we assemble our luminaires locally. The biggest advantage is that we can customize the product without having to disassemble first. And we have local partners to quickly solve specific customer problems.

- We can do powder coating at the end of the street
- There is a CNC metalworking company in the same building
- Our sheet metal partner is 1 hour away from us
- The social workshop is a 10 minute walk away

This gives us Flexibility and Speed!

HOW DOES IT WORK?

Here is an example of our tailor-made nursery luminaire. This luminaire was specifically designed for a baby room concept. Small children would easily become dazzled by a direct ceiling light when they are lying on their backs. As a solution, we developed a luminaire that can be adjusted to illuminate the walls.

Indirect light means less stimuli, and thus more relaxed babies. The HV-FD technology is also capable of very deep dimming. This is perfect for parents who want to check on their babies in the middle of the night without waking them up.

This light fixture blends in well with the trendiest and friendliest nurseries thanks to the wooden accent ring and the green paint. The adjustable luminaire is also ideal for creating a cosy, pleasant atmosphere in your living room or retail space.

Examples of "making it your own"

CUSTOM MADE

Twist lock system

CNC milled ring + laser cut frame

TRIMLESS FIDO

The standard Fido version has been transformed into a trimless version for Gyproc ceilings.

Standard Fido + bajonet ring

GRID LIGHT

Except for the LED technology, almost everything is made from new parts. In particular, the grid to limit the longitudinal visibility was a requirement of the customer.

Tailormade aluminium tube

Flexible in making different heights

PENDANTS

We cut the profiles to the desired length in-house. We can handle any length between 250 mm and 6 meters. We can also adjust the colour based on the project requirements.

Fluxe 75

ODION WITH CASAMBI 2700-6500K

This tuneable Track Spot can be used in a standard 3 Phase track. Both Dale and App based Casambi control are possible. This enables both dimming and colour changing per individual luminaire.

CASAMBI

Various lengths

FIDO TUBES

Playing around with various lengths and colours to create architectural shapes that have a distinctive aesthetic. We can cut the tube to a variety of lengths.

Fido

Datacenter specials

LINEAR LINE

Special energy-efficient luminaire aimed at data centers. It can be mounted directly on a cable duct via a handy suspension system. As a possible pendant variant, it can also be attached to the ceiling with hanging wires.

Both can be connected the same way

EMERGENCY LUMINAIRE

Stand alone IP65 luminaire with wide beam and 318Lm for 3hrs. Can be connected in the same way as the Linear Line to a cable trunking.

CUSTOM MADE

MAKE IT YOUR OWN

ODION SPOT

A cable basket holds the Odion Trackspot's head in place. It is a cheap way to light up your (industrial) project with a lumen output of 6300Lm.

SUSTAINABLE LINEAR LIGHT

At the end of its lifespan, this luminaire can be equipped with new technology. After retrofit a 7-year warranty can be offered again. The optics are available in different beam widths including an asymmetrical version.

FLAT CABLE

The Flat Cable is the quickest option if you need to complete your installation quickly. The 5-pole tap off's can be assembled by Illuxtron at any location and any length you desire.

CUSTOM MADE

MAKE IT YOUR OWN

All products are developed by our own people and then assembled in various workshops by people with a disadvantage on the labor market. The range is aimed at the higher market segment and guarantees the use of high quality materials, resulting in a warranty of 7 years. 7 years warranty can be guaranteed.
